

№	Company name	Brief description
1	LLC «BIG» (Limited Liability Company)	Cosmetics company BIG is one of the five largest Russian manufacturing companies. It has a 30-year history of success in the perfume and cosmetics market of Russia. The company serves a full product cycle. It has all the necessary capacities and professional competencies in the field of product development, production, logistics, marketing and distribution
2	Closed Joint Stock Company Bakery and Confectionery Plant "Kolomensky"	<p>Kolomoisky Bakery and Confectionery Holding is the largest bakery enterprise in Russia. It is the absolute leader in the production of bakery products. In addition to its main activity - baking, Kolomensky specializes in the production of confectionery and quick-frozen products. Modern equipment and the use of innovations allowed the Kolomensky Holding to become one of the largest manufacturers of bakery, confectionery products and, in particular, wafer cakes in Russia.</p> <p>One of the main enterprises of the holding - CJSC Kolomensky has been operating since 1956. The enterprise became the basis of the Kolomensky Holding, which today has 14 enterprises. Based on experience proven over the years, the enterprise continues to develop successfully.</p> <p>At the moment, from the assortment of confectionery products, the Kolomensky Holding produces wafers, wafer and chocolate sweets, cookies, gingerbread, dry biscuits and zephyrs.</p> <p>The plant's own laboratory controls the entire process of product creation: from careful selection of ingredients to the use of safe packaging.</p>
3	Monetnyi dvor univers LLC	<p>“Monetnyi Dvor Univers” — is the place where fine chocolate is produced. We would like to share with you our secrets, knowledge and, what is most important, the delight of really high-quality chocolate consuming. In 2003, we stamped the first lot of chocolate medals for the production of which the company was created. Today we are a rapidly developing and successful player on the market and in our treasury, not just “sweet gold”. Now we are producing a very wide spectrum of chocolate products and fulfil unique orders. The quality of the products and creative approach in the production are the key priority that has been remaining unchanged for all the years of the company’s operation. We are concerned to make the process of buying entertaining and comfortable for you.</p>

4	Intellectual Robot Systems LLC	<p>The company designs and produces high-tech robotic systems for key industries. Our robotic engineered systems are part of the production lines of production plants and applied for automated welding, cutting, surface treatment, thermal spray protective coatings, and casting. In addition, we produce: unique product mechanization systems, positioners, rotary tables; grit blasting and sandblasting equipment; tumbling equipment; mounting plates, burrs.</p>
5	LGA Production and Scientific Firm	<p>LG automation Production and Scientific Firm is a Russian company, a developer and manufacturer of valves as elements of process control systems for petrochemical, oil refining, metallurgical, energy, nuclear, gas production, gas processing, chemical, food and other industries.</p> <p>Since 1993 LGA Production and Scientific Firm specializes in the development and manufacture of valves, pneumatic drives and attachments. The valves produced are used to control liquid and gaseous media flows (oil, oil products, gas, steam, water, food and sterile products, suspensions, slurries, acids and alkalis of any concentration).</p> <p>The company represents a complete production cycle from development to manufacturing, including post-warranty service of products.</p> <p>The valves manufactured by LGA Production and Scientific Firm are successfully operating at more than 1,500 domestic and foreign enterprises</p>

6	Chromos Avtomatizatsia LLC	<p>CHROMOS is one of the leading manufacturers of chromatography systems, a supplier of analytical and measuring equipment for laboratories of international and Russian enterprises. Chromos has established itself as a reliable partner and leader in chromatography market.</p> <p>Activities:</p> <ul style="list-style-type: none"> · Development and production of gas, liquid, and Process chromatographs; · Metalworking; · Turnkey Laboratory solutions; · Production of laboratory Furniture. · Production and full equipping of analyzer houses
7	JSC FOMOS-MATERIALS	<p>Fomos-Materials Company manufactures precision elements, blocks, sections and wafers made from industrial crystals of Lanthanum-gallium silicate (LGS), Lanthanum Gallotantalate (LGT), Calcium gallotantalum silicate (CTGS), Lithium Niobate (NL), Lithium Tantalate (TL), Calcium Molybdate (MK) and Gallium gadolinium-aluminum garnet activated by cerium ions (GGAG:Ce). The company has a number of technological know-how protected by patents, and is also certified according to GOST R and ISO quality standards.</p>
8	Joint stock company “Molecular Electronics Research Institute”	<p>JSC "Molecular Electronics Research Institute" (MERI) - a leading research center within the “Element” Group of Companies. MERI conducts research and development work in the field of micro- and nanoelectronics, including the development of families of technologies with design standards of 180-90-65-28 nm for a wide range of applications: high-performance data processing, low power consumption, mixed signal processing, RAM and non-volatile memory, technologies based on the integration of heterojunction SiGe BT and CMOS, etc. In 2016, by order of the Government of the Russian Federation, JSC MERI was designated the organization responsible for the implementation of the priority technological direction "Electronic Technologies" of the Russian Federation.</p>

Products	Web-site
<p>Skincare and professional cosmetics of various brands and price categories, including separate lines for children.</p>	<p>www.bigcom.ru</p>
<p>Confectionery products – waffles, wafer cakes</p>	<p>www.khleb.ru</p>
<p>Chocolate and chocolate products, chocolate bars, products under the exclusive trademark "Masha and the Bear."</p>	<p>chocomoney.ru</p>

Robotic Technological Complex for Gas-Thermal
Spraying of Protective Coatings

Application areas: Application of protective coatings,
repair of components and products in Aviation, Energy,
Hydropower, Oil and Gas, Mining, Metallurgy,
Mechanical Engineering, Textile Industry.

High-tech surface treatment of products and gas-thermal
application of thermal barrier protective coatings on gas
turbine engine components, corrosion- and wear-
resistant protective coatings on drilling equipment
components, which significantly increase the service life
of critical components.

<p>GC CHROMOS Gas Chromatography Complex, designed for solving analytical tasks in laboratories for quality control of gaseous and liquid environments, analysis of pollutants in various media, pesticide analysis, PCB and other toxins analysis, analysis of alcohol-containing liquids, and detection of counterfeits.</p>	<p>has.ru</p>
<p>Piezoelectric sensitive elements made of lanthanum gallium tantalate. They are used as sensitive elements for high-temperature pressure and vibration sensors based on the direct piezoelectric effect.</p> <p>Application area – vibration and pressure monitoring systems for equipment operating at extremely high temperatures (from 350° to 950°C).</p>	<p>www.newpiezo.com</p>
<p>FeRAM Chip, Silicon Capacitors (MOS Capacitors manufactured using trench technology, with capacitances ranging from 100 pF to 10,000 pF), Software-Hardware Complex "Zvezda" for cryptographic protection of information in the Internet of Things (The complex consists of a chip integrated into end devices and a cryptographic server ensuring secure communication with end devices and managing cryptographic keys), Chips for bank cards based on microcontrollers of the MIK51 family (MIK51 – a family of secure microcontrollers for smart cards used in electronic documents, payment cards, and cryptographic tokens), Chips for electronic documents based on microcontrollers of the MIK51 family.</p>	<p>www.niime.ru</p>

HS code	Description of the potential customer
3304, 3305, 3306, 3307, 3401	<p>Distributor, dealer network, retail network, distributor of professional products for beauty salons and specialty retail.</p> <p>The company actively exports through the AZAD SEZ and is interested in partners in Anzali. They plan to build a production facility in Iran. The main current supply is tinting balms.</p>
1905319900 1905329900 1905321900	<p>Importers – distributors, networks. They are interested in re-exporting to Iraq and other countries and are focused on market analysis and understanding the overall market conditions. They would like to exchange experiences with colleagues who are already supplying confectionery products to Iran.</p>
	<p>Distributor, wholesale buyer, marketplaces. Focus on products under the trademark "Masha and the Bear" (which traditionally has demand in Muslim countries), as well as products with Russian symbols.</p>

851,580,100	<p>Aviation, Energy, Hydropower, Oil and Gas, Mining, Metallurgy, Mechanical Engineering</p> <p>Companies that produce products and companies engaged in the technological maintenance and repair of equipment and its components, dealers of high-tech equipment/equipment for metalworking.</p> <p>The most promising segments:</p> <p>Metallurgy - robots for welding, cutting, and spraying various coatings</p> <p>Aviation - repair of gas turbine engines, service equipment (for example, for servicing Boeing and Airbus aircraft landing gear)</p> <p>MAPNA - a meeting is needed with technicians. In contact with management. Products for servicing and repairing gas turbine engines</p> <p>Oil and Gas, particularly drilling - servicing of downhole motor rotors, target audience - drilling contractors</p> <p>Service subsidiaries of state corporations in these sectors involved in repair work.</p>
848180 848190 903289 903281	<p>Application areas: Petrochemical, oil refining, metallurgy, energy, nuclear, gas extraction, gas processing, chemical, and other industries.</p> <p>Metallurgy. Energy.</p> <p>Target audience: Priority – service companies for the oil and gas industry.</p> <p>Key areas of application for the products: oil and gas industry (oil extraction, oil refining, gas distribution, gas processing), chemical industry (gunpowder production), metallurgy (valves for oxygen stations). Priority – enterprises that require specialized valves with enhanced protection parameters, resistance to pressure, temperature, and aggressive environments.</p> <p>Manufacturers of modular equipment and system integrators may also be of interest.</p>

<p>902720</p>	<p>Laboratories and companies that use laboratory chromatographs (with experience in this field). Areas of application for the products: oil and gas, petrochemicals, environmental protection, water utilities, chemical laboratories, pharmaceuticals, veterinary medicine, agrifood industry and beverage production, medicine, forensic science, police. Based on experience, one of the good potential partners could be mass spectrometer manufacturers.</p>
<p>3824999608 8541600000</p>	<p>Wholesale buyer. A manufacturing company in the field of vibration monitoring sensors for harsh environmental conditions (gas turbine engines, nuclear reactors), as well as pressure monitoring in gas pumping stations at high temperatures. Key and service enterprises involved in nuclear programs and peaceful nuclear energy programs. A separate category of potential partners – manufacturers of tomography devices.</p>
	<p>State corporations, manufacturing enterprises, critical infrastructure facilities, government agencies, scientific and educational institutions.</p> <p>Local microelectronics design centers and IP boxes for microchip development, consumers of microchips for bank cards, manufacturers of cardiac sensors (for medical and sports applications), consumers of identification chips (for biometric passports and access control systems).</p>

Names of Iranian companies with which you would like to have a meeting	Experience in Iran
	There are shipments, we have found an agent, and we are conducting negotiations with potential partners. Their Tonica cosmetics are popular in Iran.
